SECURITY AND SAFETY FOR • PEOPLE • BUILDINGS • AREAS

Will we be seeing you at Danish Security Fair ?

Danish Security Fair is Denmark's new trade fair, presenting the latest technology in electronic and mechanical products and systems to promote the security of people, buildings, areas and data. Security is at top of the agenda here, and it is the place where you establish valuable contacts and do business.

TRADE FAIR WITH HIGH STANDARD

The security industry is developing with great intensity, as it adapts to digital innovations, the global situation and new threats. This means that a common forum is required to focus on tomorrow's solutions under one roof. Thanks to our robust conference program, the fair will focus on issues such as the risks and opportunities that are presented by digitalisation and the Internet of Things.

WHO EXHIBITS

A joint forum of advisors, manufacturers, wholesalers and installers within the security industry. Danish Security Fair brings these stakeholders together, to offer advice and present the future of security options to our visitors.

EXTENSIVE MARKETING

Danish Security Fair is being promoted through relevant medias, ads, direct mails, daily press and on the fair's website. MESSE C's press team will ensure media coverage before, during and after the fair.

CONFERENCE PROGRAMME

On the conference stage, visitors can learn about new trends, products and opportunities. We invite experts and debate partners to discuss subject matter that is both inspirational and topical.

MECHANICAL SECURITY

GUARDS

SURVEILLANCE

FIRE SAFETY

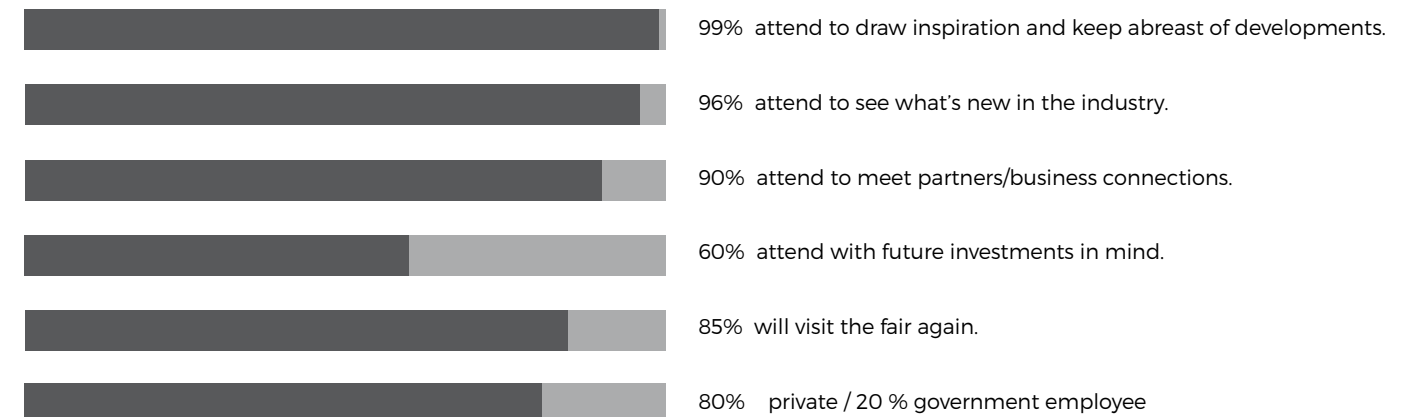

ELECTRONIC SECURITY

MEET THE CUSTOMERS

Visitors at Danish Security Fair are decision makers and key persons from the security industry. 74,7% of the visitors have the power to make purchases on behalf of their business.
